

100 YEARS OF INNOVATION

ALUMNI SPOTLIGHT

Douglas Johnson '73 discovered his passion for education after more than two decades in the engineering industry. He currently teaches high school algebra and geometry to students in the Indianapolis, IN area.

Beginning his career at Diamond Shamrock Chemical, he stayed with the company for four years before enlisting in the U.S. Navy. In that role he served four years active duty and continued in Reserves until 2002, retiring as Commander.

Following active duty, Doug joined Union Carbide Corp., Linde Division working in the air separation plant and East Region Office, respectively. He then transferred to the Central Region Office where he focused on the division's purchasing operations.

Unable to remain with Linde through its reorganization into Praxair Inc., Doug found a new purchasing position with Indiana University–Purdue University Indianapolis (IUPUI). After six years with IUPUI, he pursued his teaching license and transitioned to his second career.
