

DR. JOHN MARKELS is Sr. Vice President of External Manufacturing and Emerging Markets in the Merck Manufacturing Division, with responsibility for all contract manufacturing globally, as well as the transformation of Merck's supply chain to support Merck's Emerging Markets growth aspirations. Prior to this Dr. Markels had responsibility for MMD Operations (manufacturing facilities) for Europe, Middle East and Africa (EMEA) and Asia Pacific (AP) and has lead production operations at the regional level since June 2006. Dr. Markels served as Vice President for Strategy and Execution from 2004 to 2006, leading the implementation of Merck's transformational Supply Strategy. Prior to that Dr. Markels had a variety of roles in Science and Technology supporting API, Vaccine, Sterile, and Pharmaceutical manufacturing, most recently as the Vice President of Pharmaceutical Technology and Engineering responsible for process support and process engineering for Merck's Pharmaceutical Operations globally. Dr. Markels received his Ph.D. in chemical engineering from the University of California, Berkeley and his B.S. in chemical engineering from the University of Delaware, and serves on the Academic Advisory Board for both institutions.
