

Prasad Dhurjati is a Professor of Chemical & Biomolecular Engineering with joint appointments in the Department of Mathematical Sciences and Biological Sciences at the University of Delaware. His research specialization is in Biotechnology, Artificial Intelligence, Systems Biology and Systems Medicine. After obtaining a Ph. D in chemical engineering from Purdue University in 1982, joined the faculty of the University of Delaware. He is the author of over 125 research publications in leading journals with a total of over 3100 citations, a Hirsch index of 31 and an i10 index of 56. In 1986, he was awarded the National Science Foundation Presidential Young

Investigator Award by President Ronald Reagan. He has mentored twenty Doctoral and Masters students, twenty postdoctoral associates and over a hundred undergraduate research theses. His students have been very successful in industry (Merck, Bayer, Pfizer, Dow, Abbot, DuPont, Gore, etc.) and in academia (Johns Hopkins, University of Glasgow, etc.). In 1988-89, he was a visiting scientist at the Pasteur Institute in Paris, France. He has also been a visiting professor at the University of Lyon, France, VNIT, Nagpur, India and University of Toronto, Canada. In 2004, he was elected a Fellow of the American Institute of Medical and Biological Engineering. He served as President of the Faculty Senate of the University of Delaware for the academic year 2016-2017. A detailed CV is available at
