

**Dr. Christopher J. Roberts** is a Professor and the Director of the Center for Biomanufacturing Science and Technology in the Department of Chemical and Biomolecular Engineering at the University of Delaware (UD). He is also the Director of the Biomolecular Interaction Technology Center, and the Site Director of the Center for Pharmaceutical Development at UD. He received a Bachelors of Chemical Engineering degree from UD, and a Ph.D. in Chemical Engineering from Princeton University. Prior to joining UD in 2002, he worked in the pharmaceutical industry as a formulation scientist for protein and small-molecule based drugs.

The Roberts laboratory focuses on fundamentals and applications of protein physical and chemical stability, (mis)folding, aggregation, kinetics, statistical mechanics, and thermodynamics to address questions of biopharmaceutical product design, stability, and manufacturing.
