WORKSHOPS, STUDY ABROAD, AND SHORT COURSES

1. University of Delaware Study Abroad Program in Chemical & Biomolecular Engineering. I am the director of a study abroad program for UD CBE juniors and seniors, conducted biannually at the University of Melbourne (UM) during the January winter session. Our January 2017 program brought a group of 32 UD students to UM, where I taught UD’s Biochemical Engineering course for the UD students as well as a group of UM students. In January 2015, I co-directed this program and co-taught UD’s Senior Laboratory course to 31 UD students and one UM student.
2. GO:LEAD (Graduate Opportunities: Learn, Engage, AND Discover) Program. I co-organize this program run annually at the University of Delaware. GO:LEAD aims to increase enrollment of students from underrepresented backgrounds in Ph.D. studies in the chemical sciences (across the U.S.) by informing and inspiring talented seniors from across the country on the benefits of a graduate education. The target scientific areas are Chemistry/Biochemistry, Chemical Engineering, and Materials Science. The GO:LEAD activities include interactive workshops, presentations, and networking events held during a long weekend on the UD campus.
3. Delaware-CTR ACCEL – Accelerating Clinical and Translational Research. I am a junior faculty mentor for UD’s Department of Biomedical Engineering, and I provide broader junior faculty mentoring service in a variety of other roles (career and mentoring panels, lectures, etc.) through the DE-CTR ACCEL program.
4. Future Faculty Workshop. I served as a faculty mentor in this program designed for late stage Ph.D. students and post-doctoral scholars interested in academic careers. The program was held at the University of Delaware in August 2016.
