MAJOR AWARDS AND HONORS

1. Biotechnology and Bioengineering (B&B) Daniel I.C. Wang Award 2015

The B&B Daniel I.C. Wang Award was initiated in 2008 to honor a younger member of the biotechnology and bioengineering community. This award “honors an accomplished younger member of the community for his or her commitment to the Journal and the community it serves.” Eligible nominees must be less than 35 years of age or have received his or her Ph.D. degree in the last 8 years, and have published a paper in the *Biotechnology and Bioengineering Journal* in the last 3 years. The award consists of a plaque, an honorarium of \$3,000, and acknowledgement of the recipient in the Journal. The award is presented annually at the national ACS BIOT Meeting. The recipient is invited to present a lecture and is also honored at a dinner hosted by John Wiley and Sons, Inc.

2. Gerard J. Mangone Young Scholars Award of the Francis Alison Society 2012

The Mangone Young Scholars Award is given annually to a tenure track assistant professor at the University of Delaware who has shown extraordinary distinction through research and publications. The award was created and funded by members of the Francis Alison Society which consists of senior professors who have received the Francis Alison Faculty Award, the highest award given to a faculty member at the University of Delaware. Nominations for the award are made by department chairs. Criteria for the award are originality and excellence of the nominee's publications, especially where research has contributed significantly to the academic program of the department or college. This award is one of the most distinguished honors at the University of Delaware. The award includes a ceremonial recognition at a special University occasion, a cash award, and an honorary plaque.

3. Outstanding Junior Faculty Member, College of Engineering 2012

The Outstanding Junior Faculty Member Award is given annually to a tenure track assistant professor in the College of Engineering at the University of Delaware. This is the most prestigious award given annually in the College of Engineering to a junior faculty member. Professors are nominated for this award by the Department Chairs within the College. The Named Professor College Faculty Awards Subcommittee selects the award winner each year. The appointment is for one year and carries a \$5,000 prize.

4. National Science Foundation (NSF) CAREER Award 2011-2016

The NSF Faculty Early Career Development Award, which includes a \$400,000 grant, recognizes junior faculty for their role as teacher-scholars and for integrating education and research within the context of their organization's mission. Proposals are reviewed by peer scientists in the field. This highly competitive award is “bestowed on those scientists and engineers deemed most likely to become the academic leaders of the 21st century.” According to NSF, less than 20 percent of those submitted each year are selected for funding.

5. James E. Bailey Young Investigator Award in Metabolic Engineering

2008

The James E. Bailey Young Investigator Award is presented every two years at the International Metabolic Engineering Conference. The award recognizes “an outstanding research contribution to the field of metabolic engineering by a young investigator. The recipient will have advanced the frontiers of metabolic engineering through originality and creativity of experimental or computational concept application.” Eligible nominees must be less than 36 years of age. The award consists of a plaque, an allowance toward attending the Metabolic Engineering Conference, and a \$2,000 personal check. This award was instituted in 2002 in honor of James E. Bailey, a visionary of future directions in biotechnological research and a contributor to the founding and advancement of the field of metabolic engineering.

6. DuPont Young Professor Award

2008

The DuPont Young Professor Program, sponsored globally by the DuPont Fellows Forum, is “designed to provide start-up assistance to promising young and untenured research faculty working in areas of interest to DuPont's long-term business”. Each young professor receives \$75,000 in three annual grants of \$25,000. Professors are nominated by a member of the DuPont technical staff. The nominator serves as the liaison between the company and the faculty member. The DuPont Fellows Forum, which includes the company's top scientists, selects the award winners each year. Each grant recipient is invited to present a seminar on his or her work to the DuPont research community in Wilmington, DE. The DuPont Young Professor program is administered by the DuPont Center for Collaborative Research & Education.
