JOIN a leading team of investigators on projects that will foster your interests, education, and research skills in a stimulating multidisciplinary science and engineering environment. Focus on the engineering challenges of the 21st century. Help develop conversion. Browse our web page at www.che.udel.edu for updated news and information.

A University of Delaware Research Experiences for Undergraduates program sponsored by the National Science Foundation and the Department of Defense Air Force Office of Scientific Research

For Summer 2018

Application deadline: February 1, 2018
The University of Delaware has a college-town atmosphere, yet is centrally located between New York City and Washington, D.C., at the heart of the east coast’s chemical and energy industries.

**Location**
The University of Delaware has a college-town atmosphere, yet is centrally located between New York City and Washington, D.C., at the heart of the east coast’s chemical and energy industries.

**Apply**
Application to the program is coordinated through the Department of Chemical and Biomolecular Engineering. The application deadline is February 1, 2018, but earlier applications are encouraged. Browse our web page at www.che.udel.edu for updated news and information or contact us at cheg-reu@udel.edu

**Contact**
- telephone 302-831-2543
- email cheg-reu@udel.edu

**Choose your research topic**
Chose projects from over 13 faculty research groups and work as an independent research student alongside PhD students and postdoctoral researchers in Delaware’s Chemical and Biomolecular Engineering, Materials Science, and Biomedical Engineering departments. Core research themes of the REU include solar energy, biomass conversion, thermoelectrics, fuel cells, and bio-inspired materials.

**Visit industrial labs**
Participants will visit several global research facilities in the Delaware valley during the summer, including Dow, DuPont, ExxonMobil, Air–Liquide, and W. L. Gore global R&D. The R&D projects REU students will see span biomass-generated energy to the development of next-generation fuel cell membranes. Two trips are scheduled each summer.

**Develop skills**
You will have ample opportunity for professional development, including workshops on research ethics, written and oral communication skills, and grad school prep boot camp, as well as the chance to hear world-class national and international scientists and engineers as part of the Center for Catalytic Science and Technology and Center for Molecular and Engineering Thermodynamics seminar series.

**Non-Discrimination Statement:** The University of Delaware does not discriminate against any person on the basis of race, color, national origin, sex, gender identity or expression, sexual orientation, genetic information, marital status, disability, religion, age, veteran status or any other characteristic protected by applicable law in its employment, educational programs and activities, admissions policies, and scholarship and loan programs as required by Title IX of the Educational Amendments of 1972, the Americans with Disabilities Act of 1990, Section 504 of the Rehabilitation Act of 1973, Title VII of the Civil Rights Act of 1964, and other applicable statutes and University policies. The University of Delaware also prohibits unlawful harassment including sexual harassment and sexual violence. For inquiries or complaints related to non-discrimination policies, please contact: Susan L. Groff, Ed.D., Director, Institutional Equity & Title IX Coordinator, 305 Hullihen Hall, Newark, DE 19716, (302) 831-8063, groff@udel.edu
