MARCH 08
10-11:00 am
Colburn Lab Room 102

TATIANA SEGURA
Duke University Professor
Engineering Therapeutic Angiogenic Materials for Brain Repair

MARCH 29
10-11:00 am
Colburn Lab Room 102

MATTHEOS KOFFAS
Rensselaer Polytechnic Institute Dorothy and Fred Chau ’71 Career Development Constellation Professor
A Sense of Balance: Development of Metabolic Pathway Balancing Approaches for the Production of High Value Chemicals in Recombinant E.coli

APRIL 08
10-11:00 am
Colburn Lab Room 102

KAUSHAL REGE
Arizona State University Professor
Aminoglycoside-derived Molecular and Cellular Technologies for Accelerated Discovery Platforms

APRIL 26
10-11:00 am
Colburn Lab Room 102

ALLAN P. COLBURN MEMORIAL LECTURE
JAMES SWAN
Massachusetts Institute of Technology Assistant Professor
Large Scale Simulation of Colloidal Hydrodynamics: Heterogenous Particles, Structures and Flow Patterns

APRIL 12
10-11:00 am
Colburn Lab Room 102

KAUSHAL REGE
Arizona State University Professor
A Sense of Balance: Development of Metabolic Pathway Balancing Approaches for the Production of High Value Chemicals in Recombinant E.coli

MAY 08
10-11:00 am
Colburn Lab Room 102

CHARLES SCHROEDER
University of Illinois at Urbana-Champaign Professor, Ray & Beverly Mentzer Faculty Scholar in the Department of Chemical & Biomolecular Engineering
Self-assembly and Single Molecule Charge Transport in Conjugated Organic Materials

MAY 17
10-11:00 am
Colburn Lab Room 102

KURT WOHL MEMORIAL LECTURE
SUSANNAH SCOTT
University of California, Santa Barbara Distinguished Professor
Duncan & Suzanne Mellichamp Chair in Sustainable Catalysis
Kinetics and Mechanisms of Reactions Relevant to Lignocellulosic Biomass Conversion in Porous Heterogeneous Catalysts
